download, 4shared.com, MediaFire, Rapidshare, Mega, Google Drive, YouSendIt, FileServe. Such organization, 4shared.com for example, is one of the most successful portals that exist on the Internet. Almost all files you can find here are uploaded by users and they are not uploaded with the purpose of showing this to someone else. 4shared.com seems to have been operating since 2002 and in this time has turned into a big and popular server. Today, more than 60 million people visit 4shared.com each day and the number of uploaded files is still growing. What is interesting, 4shared.com itself offers download options of many files, which is an important issue. Not all files that are uploaded to 4shared.com are available for download. How to Download 4shared.com for Windows PC from SoftFamous. Free Download (64-bit / 32-bit)Q: How to find out memory usage of any process without installing an application? I have tried pmap to find out the memory usage of any process but, this is unable to find out the memory usage of any process when the process is not running. I have another requirement to get the total memory usage of any process running. Is there any other way to find out the memory usage of any process? A: If you have root privilege, then you can use the following command to get the memory usage of a process: # ps -ef | grep | grep -v grep | awk '{printf \$5}' | sed's/[0-9]\+//g' It gets the memory usage of a particular process, and outputs it in the same format as ps. Output example: \$ ps -ef | grep jdk | grep -v grep | awk '{printf \$5}' | sed's/[0-9]\+//g' 8959K This is not a very elegant solution, and I strongly recommend against using it. However, if you are in a position where you need it, then you can use it. Source: March 21, 2019 19:20 IST The two alleged militants were apprehended from Ratnapuri village in the district after they were caught by the security forces on Friday. Latur: Three persons accused of being militants were shot 82157476af
